

AFTER their 3-1 triumph at Ilford on Saturday, Wycombe Wanderers stage their first home Rothmans Isthmian League match tonight (Tuesday) when they take on Hayes. The Church Road club became one of the first winners of the £40 prizes for a three clear goal victory, when they beat Barking 3-0 on Saturday.

Hayes have their problems tonight, however. Their leading striker Robin Friday, who scored two of the goals against Barking, started a month's suspension yesterday while Tony Amos, with Wycombe last season, is on a two week ban and also broke a bone in one of the club's recent pre-season friendlies.

Among the Hayes line-up is Les Hartridge, who also had a spell with Wanderers, as did their centre-half and skipper Bobby Hatt, the hero of their F.A. Cup run last term.

Another veteran, Kenny Kent, who was Blues assistant manager with John Reardon when Chesham reached Wembley, is still holding down the full back spot while Alan Tottman, who played for Maidenhead and Slough last season, has fitted in well this season.

The Hayes team will be selected from Bath, Raine, Kent, Dell, Hatt, Thomas, Bachelor, Neville, Tottman, Hartridge, Roberts, Wilks, Drabwell.

Apart from Saturday's victory, Hayes have beaten Hounslow 5-0 and Hillingdon Borough 4-0 in their friendlies.

Wanderers themselves could well make one or two changes from Saturday's side for although the margin of their victory was considerable, their overall performance was a little disappointing.

Tony Brothers could drop out of midfield due to severe blistering after Saturday's match while Dave Bullock may return at centre-half for Anderson, who failed to impress against his former colleagues.

Kenny Swain, Wycombe's highly talented forward, was expected to sign professional forms with Chelsea yesterday, although this has yet to be confirmed. Swain trained with the first Division club last month and decided to turn pro' despite the chance of a place in the England Amateur International side.

Swain was included in the squad for three forthcoming internationals.
